Dear Randy,

It is a pleasure to write this letter in enthusiastic support of your application for the BARDA funding opportunity (BAA-18-100-SOL-00003) and to partner with you on this initiative. Your proposal to develop open-source LAMP and PCR test systems and screening programs for SARS CoV-2 addresses an urgent need in the fight against COVID-19. Based on our recent interactions it is clear that you have assembled a team with the technical experience and the ability to execute complex projects in a timely manner. As such, our company is willing to support this initiative by providing the following:

- Share and contribute methods and protocols associated with the use of a variety of sample types as a substrate for clinical testing.
- Provide advice and industry connections to ensure on custom reagent formatting.
- Logistics and delivery of reagents and consumables needed to run specified number of assays.
- Technology development, including early access and testing of new reagents utilized in the assay.
- Provide recommendations for long-term reagent storage in liquid and lyophilized formats.
- Provide letter of support the grant application.
- Assignment of individuals within the organization who can serve as a point of contact to ensure rapid communications.
- Participation in key meetings in support of the grant application.

We look forward to building on our relationship with you by engaging you in this project. We expect to provide key resources you need to achieve success. I am certain that you and your group will make substantial and critical contributions in the fight against COVID-19. Best of luck with your application.

Regards,

Dr. Colby Stoddard

Business Development Manager
